

AI-Enabled Finance Automation — AuditEngine

For audit firms and finance teams whose preparation work eats most of the engagement window before substantive work begins. AuditEngine is the production AI platform Atlas Verum operates. It automates finance, controls, reporting and audit-readiness workflows and produces audit-ready outputs that your partner auditor consumes directly. With AI integrated into the practice, the capability surface is broad and the cycle is fast.

FOR

Where it hurts

- Audit firms (mid-tier and boutique) running an AI-augmented preparation pilot
- F1000 internal audit functions scoping AI integration
- Audit-tech and finance-tech scale-ups needing domain-grounded engineering
- PE-backed mid-cap finance functions modernising their stack
- Regulatory technology buyers evaluating ICAEW Tech Accreditation peers

Operating principle

AI is the accelerator, not the auditor. Every output is reviewed under professional standards. Auditor-grade, citable, defensible. The partner audit firm consumes the outputs and forms the opinion.

PROOF

Production data from live engagements

34 SPECIALISED AI AGENTS ACROSS ORCHESTRATION, ANALYTICAL, OPERATIONAL, FOUNDATIONAL LAYERS	47 AUDIT-READY WORKPAPER TEMPLATES · FULL ISA (UK) 200– 810 COVERAGE	82% PREPARATION-TIME REDUCTION OBSERVED ON LIVE ENGAGEMENTS	<£5 API COST PER ENGAGEMENT · 90% PROMPT-CACHE HIT RATE
----------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------	-----------------------------------------------------------------------------	-------------------------------------------------------------------------

STACK

Architecture (verified live)

Layer	Technology
Frontend	React 18 + Vite + Tailwind + TanStack Router
Backend	Node.js + Express + Prisma ORM
Database + RAG	PostgreSQL 15 + pgvector retrieval over ISA (UK) 200–810 corpus
Object storage	AWS S3 Object Lock · 60-day immutable archive · ISA 230 retention discipline
AI	Anthropic Claude API · three model tiers · prompt caching · multi-agent orchestration
Hosting and billing	Vercel · Railway · Stripe Billing with metered usage
Compliance	ICAEW Technology Accreditation standard architecture · GDPR · ICO · DPIA pathway

REFRAMING NOTE

AuditEngine produces audit-ready outputs for the partner audit firm to consume during the audit cycle. The audit opinion is independent and delivered by an FRC-registered firm in Atlas Verum's partner network. Atlas Verum's role is preparation and automation. The partner's role is attestation. Two contracts, two scopes, aligned outcome.
